

2014 Latest Microsoft 70-687 Exam Dump Free Download!(71-80)

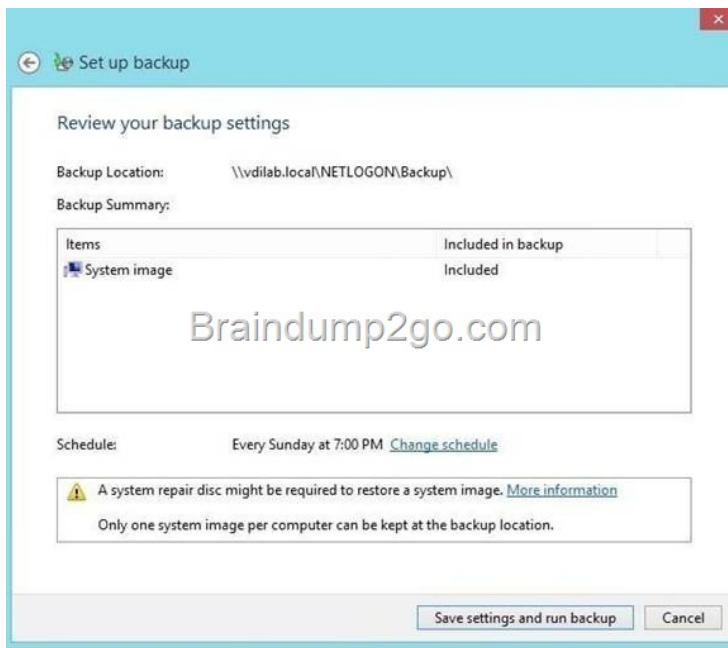

QUESTION 71 A company has client computers that run Windows 8. The client computers are in a workgroup. Windows Remote Management (WinRM) is configured on all computers. You need to configure a computer named COMPUTER1 to retrieve Windows event logs from all other computers in the workgroup. Which three actions should you perform? (Each correct answer presents part of the solution. Choose three.) A. Add machine accounts of all other computers to the Event Log Readers local group on COMPUTER1. B. Create and configure a collector-initiated subscription. C. Start the Windows Event Collector service on all computers other than COMPUTER1. D. Start the Windows Event Collector service on COMPUTER1. E. Create and configure a source computer-initiated subscription. F. Start the Windows Event Log service on all computers other than COMPUTER1. G.

Add COMPUTER1 machine account to the Event Log Readers local group on all other computers. Answer: BDG Explanation: For best management we want a collector-initiated subscription--meaning we'll be setting up the subscription at the collecting computer instead of at each individual computer. The Windows Event Collector service is requested for subscriptions to work on the computer doing the collecting. The collecting computer must be a member of the Event Log Readers local group on all computer in order to be able to read the event log. QUESTION 72 A company has client computers that run Windows 8. File History is on. An employee downloads data to a folder on drive D named Archives. You need to ensure that the user can restore files from the Archives folder by using File History. What should you do? A. Configure the File History advanced settings to include the Archives folder. B. From the File History configuration options, change the drive and select the Archives folder. C. Create a library named History and add the Archives folder to the library. D. Move the Archives folder into the Windows system folder. Answer: C Explanation:

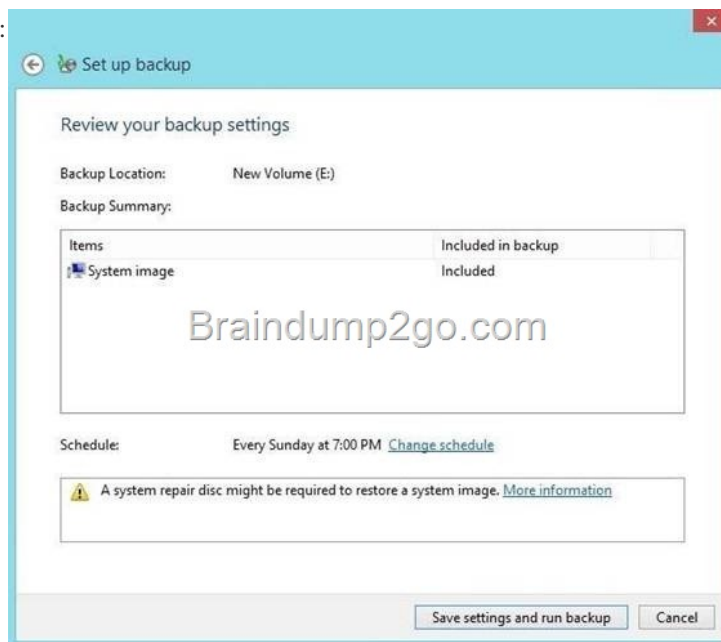

<http://blogs.msdn.com/b/b8/archive/2012/07/10/protecting-user-files-with-file-history.aspx> File History only backs up data in libraries, favorites, desktop, and contacts and must use a non-system drive for backup. QUESTION 73 You have a portable computer that runs Windows 8. You are creating a backup plan. You have the following requirements: - Automatically back up the files in your Documents folder every hour. - Ensure that you can recover different versions of the backed-up files. - Do not back up the Windows operating system files. You need to configure the computer to meet the requirements. Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.) A. Create a volume mount point in your Documents folder. B. Connect an external hard drive to the computer. C. Schedule a task to create a restore point every hour. D. Create a recovery drive on drive C E. Turn on File History. Answer: BE Explanation: File History only backs up data in libraries, favorites,

desktop, and contacts and must use a non-system drive for backup. <http://blogs.msdn.com/b/b8/archive/2012/07/10/protecting-user-files-with-file-history.aspx> QUESTION 74 A company has client computers that run Windows 8. Finance department employees store files in the C: Finance directory. File History on. A Finance department employee attempts to restore a file to a previous version by using File History. The file is not available to restore. You need to establish why the file history is not available and ensure that it is available in the future. Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.) A. Set the Protection Settings for drive C to On. B. Restore the data files from the Previous C. Versions tab located in the folder properties. D. Review the File History backup log. E. Move the file into a library. Answer: DE Explanation: File History only backs up data in libraries, favorites, desktop, and contacts and must use a non-system drive for backup. Since File History is already on we can assume the drive doesn't need to be changed. So we should review the log and move the file to a library. Volume shadow copy has been replaced with File History:

Which troubleshooting option should you use? A. System Image Recovery B. Remove everything and install Windows C. System Restore D. Refresh your PC without affecting your files Answer: C QUESTION 76 All client computers in a company's network environment run Windows 8. A client computer has two internal hard disk drives. The hard drives are configured as shown in the following table. Drive Size Free space Type ----- C 250 GB 20 GB Dynamic D 500 GB 450 GB Dynamic You are choosing a backup destination for drive C. You have the following requirements: ? Ensure that the backup file is available if drive C fails. ? Ensure that the backup file can be accessed by other computers on the network. ? Support the backup of multiple system images. You need to select a backup destination that meets the requirements. Which destination should you select? A. shared network folder B. drive D C. multiple DVDs D. external hard drive Answer: D Explanation: Shared network folder will only support one system image:

That applies to internal / external disks:

<http://windows.microsoft.com/en-us/windows7/Back-up-your-programs-system-settings-and-files> Keeping different versions of system images: If you're saving your system images on an internal or external drive, or on CDs or DVDs, you can keep several versions of system images. On internal and external hard drives, older system images will be deleted when the drive runs out of space. Conclusion is to use external HDD and share it over the network. QUESTION 77 A company has 100 client computers that run Windows Vista. The company uses several custom applications. The company plans to replace the Windows Vista computers with new computers that run Windows 8. You need to establish which of the currently installed applications will work on Windows 8.
