QUESTION 1
Case Study 1 - Litware, Inc
General Overview
Litware, Inc. is an international manufacturing company that has 3,000 employees. The company has sales, marketing, research, and human resources (HR) departments. The company is subject to regulatory compliance.
Physical Locations
Litware has a main office in New York and two branch offices in London and Paris. All offices connect to each other by using a WAN link. The offices can only communicate with each other by using a point-to-point connection. Each office also connects directly to the Internet.
Active Directory
The network contains an Active Directory forest named litware.com. The forest contains a single domain. All domain controllers run Windows Server 2019. Each office contains three domain controllers. Each office is configured as an Active Directory site.
Microsoft Exchange Server
Litware recently upgraded its entire messaging organization from Exchange Server 2013 to Exchange Server 2019. The organization now contains the servers shown in the following table.

Name	Location	Exchange version
EX01	Paris	2019
EX02	London	2019
EX03	New York	2019
EX04	New York	2019
EX05	London	2019
EX06	London	2019
EX07	London	2016

No changes were made to the organization's configuration during the transition from Exchange Server 2013 and 2019. The organization has a database availability group (DAG) that has the following configurations.

```
Name : DAG15
Servers : {EX03, EX04,
WitnessServer : ex01.litware.
WitnessDirectory : C:\DAG15
AlternateWitnessServer : ex02.litware.

```

Business Model
User accounts must be deleted from Active Directory the day after a user's final date of employment.
Business Goals

As often as possible, Litware plans to minimize the legal fees associated with reviewing eDiscovery requests by purging data as quickly as possible. Planned Changes Litware plans to implement the following changes to the network. - Use Messaging Records Management (MRM) to archive all mailbox items that are older than one year. - The company announces a new partnership with another company named Fabrikam, Inc. Fabrikam also uses Exchange for email messaging. All the Litware users in the Paris office will be required to receive email by using a fabrikam.com email address and must have this email address applied automatically to their mailbox. Technical Requirements Litware identifies the following technical requirements for the messaging environment: - Mobile devices must only sync items from the last 30 days. - All user data must be wiped from a device reported as lost or stolen. - Email items in a folder named Audits must be archived after 30 days. - Users in the sales department must never have the items in their Notes folder archived. - Whenever possible, email messages sent outside the organization must be routed through the Internet connection of the local office. - If a WAN link fails, the high-availability architecture of the messaging environment must give preference to the WAN link in the New York office. You need to restore mailbox access for the main office users as quickly as possible. What should you do? A. Create a recovery database on another Exchange server, and then restore the database from EX07 to the recovery database. B. On a server in DAG15, create a copy of the mailbox databases hosted on EX07. C. Copy the database files from EX07, and then mount the database on a server in DAG15. D. On a new server, run setup.exe /Mode:RecoverServer from the Exchange Server 2019 installation media and then restore a backup of the database. **Answer: D**
