

## Official 2014 Free Microsoft 70-158 Questions Sharing(91-98)!

**QUESTION 91** You administer a Forefront Identity Management (FIM) 2010 server in your company network. You discover that several objects do not synchronize between the FIM Service database and Active Directory Domain Services (AD DS). The required identity data has the following features: It appears in the connector space of the FIM management process. It appears in the metaverse. It does not appear in the connector space of the AD DS Management Agent. In which phase does synchronization fail?  
A. Inbound synchronization  
B. Outbound synchronization  
C. Import  
D. Export  
Answer: B

**QUESTION 92** You use Forefront Identity Manager (FIM) 2010 in your company network. You use Management Policy Rules (MPRs) and synchronization rules to provision users. You discover that from yesterday, the status for thousands of expected rule entries for external users is Pending. You need to find out the scope of the problem. What should you do?  
A. Review the MPR Explorer for MPRs triggered by an update to user object attributes.  
B. Review the FIM application log in Event Viewer for event IDs that match synchronization errors.  
C. Verify whether the Create resource in FIM option is selected for the inbound synchronization rules that match the person metaverse resource type.  
D. Verify whether the Create resource in External System option is selected for the outbound synchronization rules that match the person metaverse resource type.  
Answer: A

**QUESTION 93** You use Forefront Identity Manager (FIM) 2010 in your company network. You configure Password Change Notification Service (PCNS) between an Active Directory Domain Services (AD DS) domain named contoso.com and an Active Directory Lightweight Directory Services (AD LDS) instance. The FIM Service is hosted on a server named FIM-Srv-1. After you change the password for an AD account, you receive the following RPC exception error: ProcessID is 3252 System Time is: 7/22/2009 9:8:43:109 Generating component is 3 Status is -2146893022 - The target principal name is incorrect. Detection location is 150 Flags is 0 NumberOfParameters is 3 Long val: 16 Long val: 6 Long val: 0 You verify the following requirements: The DNS is resolving names correctly. The SPN for the target has been assigned to an AD account used to host the target process. Time clocks are synchronized to an authoritative time source. You need to identify the cause of the error. What should you do?  
A. Verify that Port 135 is open between endpoints.  
B. Verify that the SPN has been assigned to a single AD account.  
C. From the command prompt, run setSPN.exe \_L FIMSvc.  
D. From the command prompt, run setSPN.exe \_a PCNSCLNT/FIM-Srv-1.contoso.com contosoFIMSvc.  
Answer: B

**QUESTION 94** You administer a Forefront Identity Management (FIM) 2010 server in your company network. You need to ensure that only authorized users have permissions to edit Resource Control Display Configuration (RCDC) XML files. What should you do? (Choose all that apply.)  
A. Set the Visible property to false.  
B. Set the ReadOnly property to true.  
C. Include the RightsLevel attribute bound in the data source.  
D. Set the control element to `<xsd:element ref="my:Properties" minOccurs="1" maxOccurs="1"/>` in the XSD schema.  
E. Set the control element to `<xsd:element ref="my:CustomProperties" minOccurs="1" maxOccurs="1"/>` in the XSD schema.  
Answer: BC

**QUESTION 95** You administer a Forefront Identity Management (FIM) 2010 server in your company network. You need to add a user attribute named AccountStatus to the user interface in the FIM Portal. What should you do?  
A. Modify the web.config file.  
B. Set the Visible attribute of the Grouping element to true.  
C. Set the DisplayAsWizard attribute of the Panel element to false.  
D. Modify the Resource Control Display Configuration (RCDC) XML files.  
Answer: D

**QUESTION 96** You use Forefront Identity Manager (FIM) 2010 in your company network. The network has an HR system that contains a record of all employees. You create the FIM Management Agent (MA) by using default settings. The sAMAccountName has been marked as "Use for Existence test." You confirm that the user accounts in the portal are correctly marked for provisioning. You run a Delta Import (Stage Only) profile on the FIM MA and confirm that the employee accounts arrive in the connector space. However, when you run a synchronization profile, provisioning and projection do not occur. You need to ensure that employee user objects are provisioned to Active Directory. What should you do? (Choose all that apply.)  
A. On the FIM Service MA, map the connector space Person object to the metaverse Person object.  
B. Add an export attribute flow on the FIM Service MA for the DetectedRulesList attribute.  
C. Add an import attribute flow on the FIM Service MA for the DetectedRulesList attribute.  
D. Add an import attribute flow on the FIM Service MA for the ExpectedRulesList attribute.  
E. Add an export attribute flow on the FIM Service MA for the ExpectedRulesList attribute.  
Answer: ABD

**QUESTION 97** You use Forefront Identity Manager (FIM) 2010 in your company network to provide an identity management solution between Active Directory Domain Services (AD DS) and enterprise HR applications. You create the required Management Agents (MAs). You need to make searching for object attributes of join rules more efficient. What should you do?  
A. Configure the attribute flow precedence to use equal precedence.  
B. Configure the attribute flow precedence to use manual precedence.  
C. Enable indexing for indexable object attributes.  
D. Enable metaverse rules extension and select the Unload extension if the duration of a single operation exceeds setting.  
Answer: C

**QUESTION 98** You are deploying Forefront Identity Manager (FIM) to your company network. End users will use the password self-service, user profile management, and group management from the FIM Portal. You use a separate account to install all FIM software on a server

allocated for FIM installation. You need to complete the portal installation of FIM services. What should you do? (Choose all that apply.) A. Ensure that delegation is disabled for the FIM service account.B. Ensure that delegation is disabled for the SharePointService account.C. Ensure that the FIM installation account has SQL sysadmin rights.D. Ensure that the FIM Installation account has SharePoint administrator permissions.E. Configure the SharePoint Application Pool account to use the Configurable service account. Answer: CDE If you want to pass the Microsoft 70-158 Exam successfully, recommend to read latest Microsoft [70-158 Dump](#) full version.
